

Breaking Boundaries in Education: Empowering Teachers with HIIT Insights!

Project Dates

Start Date
16-01-2022

End Date
15-01-2024

We have reached the final stage of our project, and we are excited to share significant developments with you! Our main objective is to guide teachers and educational institutions in effectively utilizing HIIT results. Here are the outputs we have achieved within this framework.

Learner's Guide for HE Teachers:

This guide provides a theoretical and practical perspective on the scope of HIIT and the concept of Information Technology. It offers teachers a step-by-step approach to effectively use HIIT.

Guidelines for Higher Education Institutions:

Guiding higher education institutions in adapting online or hybrid learning to student needs, this resource includes examples from pilot applications.

Skills Recognition Guide:

Supporting the integration of HIIT outcomes into the career development of HE teachers, this guide facilitates the recognition of skills, considering the European Higher Education Area Qualifications Framework.

Policy Brief:

Prepared for educational authorities, this brief provides guidelines for transitioning to online or hybrid learning and encourages the integration of project outcomes into education policies.

Community Handbook:

Designed for all stakeholders aiming to adopt project results, this handbook aims to create an active learning network.

Next Steps and Dissemination:

The final versions of the project documents have been developed in English and will be translated into local languages for public access. Documents will be disseminated to a wide audience through dissemination and sustainability plans.

Innovation and Transferability:

Focusing on the importance of different outputs and target groups, we support specific groups with tailored guides while ensuring integration into mainstream education. Guidelines are transferable to other educational levels through adaptation.

We express our gratitude to all stakeholders who supported us throughout this process. We eagerly anticipate the successful completion of our project!
